Resting Setup Window

Resting

Resting Procedure Tasks
- ☑ Show this window
- ☐ Show electrode position diagram.
- ☐ Collect blood pressure measurement.
- ☑ Start test when measurements valid
- ☑ Provide automatic ECG interpretation.
- ☑ Print ECG report.
- ☐ View test record
- ☑ Exit when all tasks complete.
- ☐ Remote Server.

[Screens]

ECG Filter
- Electrical interference: 60 Hz
- Artifact rejection: None
- Baseline Drift Reduction: On

Default Reports

ID	Name
☐ 1200	12 Lead Standard
☐ 1201	12 Lead Standard (Notes)
☑ 1202	12 Lead Standard (Detail)
☐ 1203	3 Lead Standard
☐ 1204	3 Lead Standard (Notes)
☐ 1205	3 Lead Standard (Detail)
☐ 1206	6X2 12 Lead Standard

ECG Acquisition
- Recorder: QRS Card (USB) [Try]
- Sample Rate: 240
- Length: 10
- Average Cycles: 25

Resting Procedure Tasks

Show this Window- Shows setup window each time 'RESTING' button is selected

Show Electrode Position Diagram- Shows electrode positioning diagram before start of Resting ECG test

Collect blood pressure measurement- Allows user to input blood pressure before Resting ECG acquisition

Start test when measurement valid- Stores Resting ECG only when good/valid ECG acquisition

Provide automatic ECG Interpretation- Performs automatic ECG Interpretation before storing ECG

Print ECG Report- Print Resting ECG report automatically after test completion

View test record- Allows user to view Resting ECG data after test completion

Exit when all task complete- Closes Cardiology Suite Master screen after test completion

ECG Filter

Electrical Interference: 60Hz or 50Hz
Artifact rejection: None or Standard
Baseline Drift Reduction: On or None

You can also select **DEMO** to preview selected settings or run a demo of the software.

Default Reports

Select the reports required

ECG Acquistion

Recorder: Select device
Sampling rate: 240
Length: Total Resting ECG Test time in seconds
Average Cycle: No of beats for Averaging complex

Easy Steps To Perform Resting ECG

 A. Press Resting Button to Start a Test

 B. Enter Patient Demographic data

 C. Auto or Manual Print Test Report

 A Start Resting Test

 B Enter Patient Data

C AUTO PRINT
Must be defined
in Resting Setup-

AUTO PRINT:
a. Printer MUST be attached to the computer
b. Under Resting, Setup (**CTL+F2**)
   i) 'Print ECG Report' must be selected
   ii) Type of Report must be selected in 'Default Reports'

C MANUAL PRINT
Test will be saved to patient file
after completion of test,
it can then be printed

List of Saved Tests

MANUAL PRINT:
a. From Main Menu
   - Select a desired Patient/Test
   - Press Print Button
   - Select Type of Report (s) to Print
b. View / Edit / Typing of Notes/comments
   - Select a desired Patient/Test
   - Press Open/View Test Button
   - View Test / Type Notes
   - Press Print Button
   - Select Type of Report to Print

View Saved Test
